Kévin Sauvage

Frontend Software Engineer · Web Accessibility

kevinsauvage@outlook.com · +34 633 674 641 · Barcelona, Spain · kevin-sauvage.com · linkedin.com/in/kevin-sauvage

SUMMARY

Frontend Software Engineer specialised in web accessibility, with 5+ years building accessible, high-performance web products used by millions across 15+ countries, including Decathlon's e-commerce platforms. Took a French public transit platform from 30% to 84% RGAA compliance and made accessibility a blocking gate in CI/CD. Hands-on with React.js, Next.js, Svelte.js and TypeScript, shared component libraries and automated testing. Barcelona-based, fluent in English, French, and Spanish.

EXPERIENCE

Frontend Software Engineer

Feb 2026 – Present

Keolis Group · Barcelona · Remote

- Raised RGAA compliance on ilévia, a French public transit platform, from 30% to 84% by refactoring core UI components.
- Integrated Jest-axe and Cypress-axe into the CI/CD pipeline, preventing accessibility regressions from reaching production.
- Enforced WCAG compliance at the source by configuring ESLint (jsx-a11y + custom rules) as a required gate on every pull request.
- Fixed semantic HTML, ARIA, keyboard and screen reader issues; made accessibility a requirement from design to release.

Frontend Software Engineer

Oct 2023 – Dec 2025

Decathlon Core · Barcelona · Remote

- Architected a Svelte component library now powering e-commerce storefronts across 15+ countries, standardising UI at scale.
- Drove A/B testing initiatives on conversion and user adoption across international markets.
- Worked closely with designers in Figma and Storybook to ship pixel-perfect, accessible components with high test coverage.
- Owned the full test suite (Jest, Cypress), raising coverage and reducing the rate of production incidents.

Frontend Software Engineer

May 2022 – Oct 2023

Decathlon Spain · Barcelona · Remote

- Improved Core Web Vitals on the Decathlon Spain storefront, cutting average load time by 1.5s and lifting Lighthouse scores.
- Built a modular Svelte component system that cut duplication and accelerated delivery of new product features.
- Rolled out WCAG 2.1 accessibility standards across the Decathlon Spain storefront.
- Established internal documentation standards for components and technical decisions, improving team knowledge sharing.

Frontend Software Engineer

Jun 2021 – May 2022

Subforce · Barcelona · Remote

- Delivered full-stack features using React.js, Next.js, Node.js, and Express.js, including secure third-party API integrations.
- Designed scalable state management patterns with Redux and Context API, improving data flow across complex UIs.
- Modernised a legacy JavaScript codebase to ES6+ standards, cutting bug count and improving long-term maintainability.

SKILLS

Frontend	JavaScript (ES6+), TypeScript, React.js, Next.js, Svelte.js, Tailwind CSS, HTML5, CSS3, SCSS
Backend	Node.js, Express.js, Prisma ORM, MongoDB, Firebase
Testing	Jest, Jest-axe, Cypress, Cypress-axe, Vitest, Testing Library, ESLint (jsx-a11y)
Practices	Agile / Scrum, CI/CD, Component-Driven Development, A/B Testing, REST APIs
Accessibility	WCAG 2.1, RGAA 4, ARIA, Semantic HTML, Keyboard Navigation, Screen Reader Testing, Audits
Tools	Git, Figma, Storybook, VS Code, Cursor, Claude
Languages	French (Native), Spanish (Fluent), English (Professional — C1)
